Environmental Policy			
Version: 10.0	Date: April 2025	Page 1 of 1	
This document is relevant for WRAP Global			

WRAP is a global environmental action NGO transforming our broken product and food systems to create Circular Living. For the benefit of the climate, nature, and people.

Our mission is to embed Circular Living in every boardroom and every home.

As we develop our charity, we will conduct our own activities and operations to reflect best environmental practice, controlling both our direct impacts and the more significant indirect impacts resulting from the businesses and projects we support.

WRAP has therefore adopted the following Environmental Policy. We will:

- Commit to maintaining Net Zero (achieved in 2022);
- prevent pollution by quantifying, controlling and reporting on our own emissions to the environment, and we use high quality providers¹ to offset emissions that we cannot immediately eliminate, for example emissions associated with international travel;
- Reduce greenhouse gas (GHG) emissions by 77.3% by 2025 based on a 2019 baseline;
- Continually improve WRAP's environmental performance by monitoring progress against targets and objectives on a regular basis;
- make more effective use of resources, in line with the waste hierarchy and minimise waste sent to landfill from our offices;
- assess opportunities to improve energy efficiency and maximise GHG emissions reductions consistent with our [carbon reduction plan](#);
- appraise projects and contracts we are involved in, to ensure they assess environmental risks and comply with our Environmental Policy wherever practicable;
- review our Environmental Policy annually and set new objectives and targets; and
- communicate this policy to those working for and on behalf of the organisation to ensure understanding and delivery of our objectives and in accordance with our sustainable procurement policy.

In addition, WRAP encourages its colleagues to be environmentally responsible in their personal lives and may support initiatives by individuals that contribute to its mission.

WRAP's Environmental Policy is publicly available and the Head of Operations has accountability for ensuring adherence to the policy.

Harriet Lamb, WRAP CEO
